

CHRIS ALLEN

Chris Allen has an 18 year background in sustainable development specializing in integrating ecology in real estate development. He has made presentations on the Woodson Place project at numerous conferences and symposiums in Chicago (Urban Land Institute), Portland (IASBO), Dallas (Texas Parks and Wildlife), and Austin (Austin Green Building Program and the Wildflower Center). He is also owner and principal of Christopher Allen + Associates, a consulting firm offering planning and research support services for progressive real estate and economic development projects. He is on the Board of Directors of A World Institute for Sustainable Humanity (Bellingham, WA) and homeWORD (Missoula, MT). Professional associations include the Urban Land Institute, US Green Building Council, the World Green Building Council, and the Mexican Green Building Council.
