

## Continue Your Learning in the Garden- Tree Habitat Investigation!

At the  
Lady Bird  
Johnson  
Wildflower  
Center

What did you find living on the tree? OR, Using the signs you found, what visitors would you guess visits your tree? (moss, insects, birds)	What part of the tree was the living thing found on? (trunk, leaves, branches)	How does the living thing affect the tree? (hurts or helps)	How does the tree benefit the living thing? (food, shelter, etc.)	Is the tree: 1) the animal's entire habitat, or 2) part of the animal's habitat?
Example: Squirrel	in branches	helps to spread acorns	food and shelter	The tree is part of the squirrel's habitat.
